

Task 34: WREN – Working Together to Resolve Environmental Effects of Wind Energy

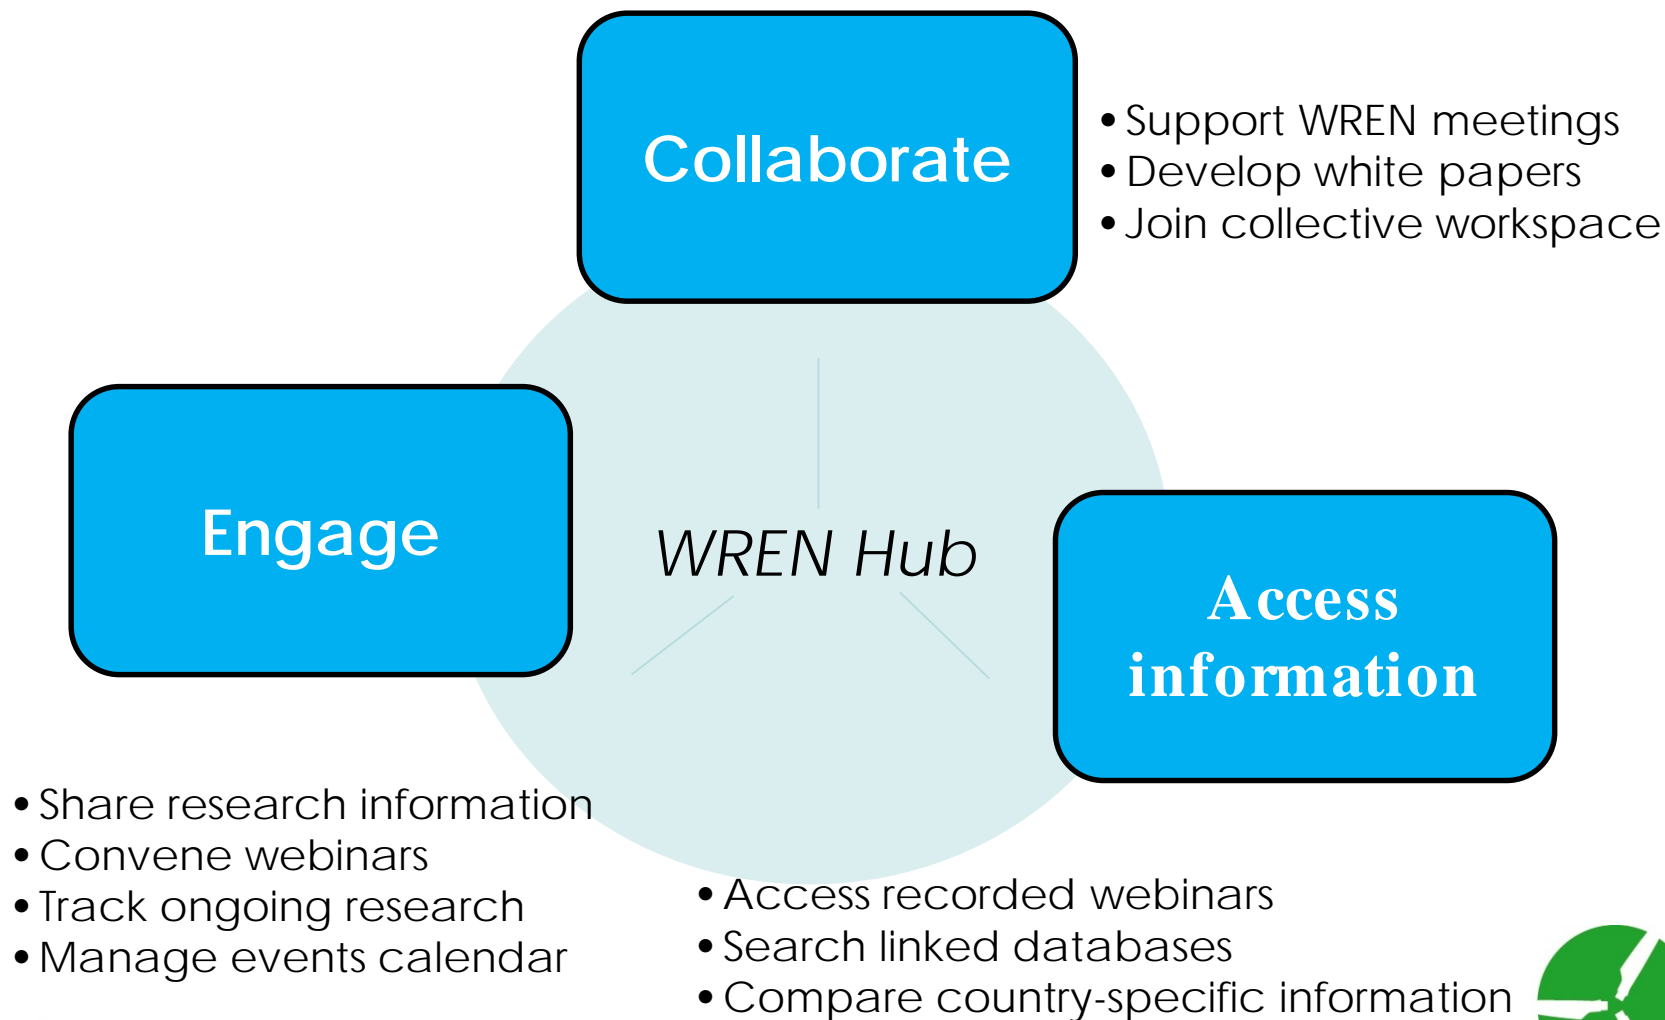

Annika Nilsson
Swedish Energy Agency

April, 2017

Members: Ireland, Netherlands,
Norway, Spain, Sweden,
Switzerland, United Kingdom,
United States, Canada, France,
Portugal

Get Started Here: Access the Tethys Knowledge Base

WREN HUB supports the dissemination of information on environmental effects of wind development. WREN Hub is facilitated by the Tethys platform and has been created to support the work of [IEA Wind](#) Task 34, made up of 6 nations involved in the development of land-based and/or offshore wind.

WREN will become an international forum for the exchange and dissemination of current knowledge on scientific research results, as well as methods for assessing, monitoring, and mitigating the environmental effects of wind energy development on habitats and the wildlife they support.

For more information on WREN, please visit the [About WREN](#) page.

Tethys Story

INORE: Sharing is Knowing

Last May, a rural village in the Picos de Europa Mountains was inundated by offshore renewable energy knowledge. As part of the annual INORE Symposium, 60 to 70 early-stage... [Read More](#)

Sveriges deltagande

- Sverige officiell medlem sedan 2015
- Vindvals rapporter in i WRENs databas, allmän strävan att få svenska forskare involverade
- Kommer att leda arbetet med vitboken "Green vs Green"
- Ny satsning på att ta fram korta forskningssammanställningar "State of Science"
- Värd för mötet våren 2017
