Breaking Silos and Human Co-creation on Multiple Levels:
One Key to Transforming Our Current Sociotechnical Transport System Regime?
Transport Systems Are Essential
We Know Burning Fossile Fuels Contributes to Global Warming

• Why do we continue?
• We know what is needed to be done, why do not new solutions penetrate the system?
• Are we unable to change?
• What are the obstacles to achieving sustainable transports?
• How can they be overcome?
Trapped in the Russian doll
- for each obstacle you overcome, there is a new bigger one on a higher level.
Transition - what is needed from leadership and human capital?
