The road towards sustainable transport
starts with a purchase decision

Fossil fuel use for road traffic according to the report on fossil-free vehicle traffic

Source: Fossilfrihet på väg, SOU 2013:84

Weight distribution between four different demands on transport services according to their importance

What will have the largest effect on the transport industry in the future?

Least Important:

- **Transport Purchaser adjust their time requirements**
- **Transport Purchaser adjust their service requirements**

Most Important:

- **Legislations**
- **Higher taxes**
- **Higher fuel price**
