

Call for a new director for 2D-TECH and Graphene center at Chalmers

Do you want to shape the future of 2D materials research at Chalmers? Would you want to help develop an already strong research community even further, in collaboration with both academic and industrial colleagues? The Vinnova competence center 2D -TECH and the Graphene Center at Chalmers are looking for a new director. The appointment is ca 30% of full time.

Responsibilities:

The director initiates and leads scientific and operational activities within the centers. The director is responsible for building lasting connections and collaborations between academic and industrial partners. The director should strive to increase the national and international visibility of the center, including giving popular science lectures on the activities within the center, and explore funding opportunities for the center.

Qualifications:

Documented expertise in 2D materials research (required); Permanently employed at Chalmers (required); Leadership experience (meritorious), Experience with industrial collaborations (meritorious); Experience of working within a competence center (meritorious)

Application:

Send an e-mail to Mikael Fogelström and Maria Abrahamsson at the latest November 26 to express your interest. Include a brief statement outlining your interest and qualifications.
