

Master thesis opportunities in Supply Chain Management at Ericsson

As part of the collaboration between Chalmers and Ericsson, Ericsson will host two MSc thesis projects about Integrated Business Planning (IBP)/Sales & Operations Planning (S&OP) starting in January 2022.

The first is about developing S&OP into a fully Integrated supply chain planning environment

- How can the S&OP process be developed to leverage all the benefits that integrated planning provides?
- How can Demand and Supply be further integrated to take complete Sales & Operational Planning decisions?
- How can financial planning, BCP, resilience planning be a part of S&OP?

The second is about contributing to building resilient supply chains through supply chain planning advancements

- What type of resilience is essential for future supply chains?
- How can resilience be built in to the Demand & Supply planning processes?
- How can supply chain planning be prepared for external supply chain disruptions?

If you are interested in these projects, then contact Dan Widerström (dan.widerstrom@ericsson.com), Arni Halldorsson (arni.halldorsson@chalmers.se) and Patrik Jonsson (patrik.jonsson@chalmers.se) ASAP with your interest and CV.
