Tips from *Learn for your future - how to succeed in university studies* (by Jannika Andersson Chronholm and Staffan Andersson)

- 1) Enter important points for each course such as tests, examinations, laboratories, seminars, assignments or other practical elements (preferably one color for each course)
- 2) Divide the course literature into suitable parts so that you read at an even pace throughout the course (and count on approx. two weeks of reading time before the exam)
- 3) Mark other things that will happen during the semester, such as e.g. trips and larger parties that will affect you not being able to study
- 4) Enter rehearsal days before each examination session

With reservation for changes
