

Call for nominations

2021 Gothenburg Lise Meitner Award

The Gothenburg Physics Centre (GPC) is seeking nominations for the 2021 Gothenburg Lise Meitner award.

Nominations are due on Monday, March 8, 2021

The Lise Meitner award honors exceptional individuals for a “**groundbreaking discovery in physics**”.

In addition to their scientific accomplishments, the candidates must meet the following selection criteria:

- They have distinguished themselves through public activities of popularizing science and are prepared to deliver the annual Lise Meitner Lecture (middle of September).
- Their research activity is connected to or benefits activities at GPC.

Nominations should include a motivation describing the achievements of the candidate, a short biography/CV, contact details and a local contact person.

We would like to thank those of you who did make an effort to nominate a candidate in the past! In case your previous nomination has not been chosen, we encourage you to submit her or his name again.

As the number of nominations has declined in recent years, we **strongly** encourage all members of GPC to nominate a candidate! Please think broadly. There are certainly outstanding physicists you either know personally or whom you would like to come here to Gothenburg.

Nominations can be sent to any member of the of the Lise Meitner Award Committee 2021:

Dinko Chakarov	(dinko.chakarov@chalmers.se)
Jonathan Tan	(jonathan.tan@chalmers.se)
Vitali Zhaunerchyk	(vitali.zhaunerchyk@physics.gu.se)
Vitaly Shumeiko	(vitaly.shumeiko@chalmers.se)
Andreas Heinz (Chair)	(andreas.heinz@chalmers.se)

Because it was not possible to hold an Award Ceremony in 2020, the winner of the Lise Meitner Award 2020, Anne L’Huillier, will receive her award in a joint ceremony for the years 2020 and 2021, planned for fall 2021.

With best regards,

The 2021 Lise Meitner Committee
