

## International exchange program at Excellence Initiative Nano/Chalmers

The Excellence Initiative Nano (EI Nano) at Chalmers funds international exchange for outgoing and incoming scholars. We believe that international exchange is pivotal for developing a successful research area. Two forms of support could be applied for. Send the application to the director (Janine Splettstoesser ([janines@chalmers.se](mailto:janines@chalmers.se))) and co-director Christoph Langhammer ([clangham@chalmers.se](mailto:clangham@chalmers.se)) with a short motivation and budget.

If granted, our support will be transferred to the department of the applicant. We strongly recommend to contact the International Staff Mobility Office – ISMO at Chalmers central administration on e-mail [ismo.stodet@chalmers.se](mailto:ismo.stodet@chalmers.se) for guidance on the practicalities related to longer international exchanges, including tax regulations.

### Outgoing, sabbatical leave

Chalmers' Nano faculty could apply for funding covering increased expenses, such as travel, insurance and housing during a sabbatical leave. Sabbatical leaves of minimum 2 months up to a year could be supported. A maximum of 300 kSEK (for 12 months) could be applied for and attracting funding from other (external) sources is highly recommended. Also, an agreement with the hosting and home department must have been established before applying for this funding.

### Incoming, visiting professors

The visiting professors' program should be used for inviting faculty from other universities to spend time at Chalmers. A minimum of 2 month stay at Chalmers is required, possibly split into a few occasions during a year. Expenses, such as travel, insurance and housing are supported but not salary or stipend. A maximum of 300 kSEK (for 12 months) could be applied for and attracting funding from other (external) sources is highly recommended. Also, an agreement with the hosting and home department must have been established before applying for this funding.
