GET FUNDING FOR INTERNATIONAL STUDENT PROJECTS IN RECYCLING

Stena Metall Group has been developing profitable recycling solutions together with its customers for over 75 years. The goal is always to optimize customer’s waste management locally and refine as much material as possible through sorting, processing and efficient logistics. The headquarter is located in Gothenburg.

Stena Metall Group has a close, long term collaboration with Chalmers University of Technology and as a part of this collaboration, Stena Metall has donated funds to the Alliance for Global Sustainability (AGS). These funds are now available for students with the ambition to include an international experience at a university abroad during their thesis project.

**How to apply:** Please send a written application (1 page) explaining the project, the intended university and department to visit and a budget of the intended expenses to Competence Centre for Recycling (CCR) board through Britt-Marie Steenari, director of CCR
Send the application to bms@chalmers.se

**Rules for funding from the Stena Metall AGS funds.**

The overall objective of funding international experiences for interested students is to prepare them for work in a globalized world and a more circular economy.

- Students may apply for funding of projects at maximum 30,000 SEK.
- The student project must be connected to a Master Thesis work or a PhD level project.
- The funding will only cover expenses related to a visit abroad. Thus, a Chalmers student doing some of the project at an international university or an international student coming to Chalmers.
- The funding will only support travel expenses, public transportation and accommodation.
- The project’s sustainability aspect must be motivated.
- The project must include a recycling and/or material recovery aspect.
- A written report of the lessons learned during the international visit (2-3 pages) must be submitted to Stena Metall after the trip along with all receipts confirming the budgeted expenses.
